

REMARKS

The interview with examiner Lee on October 27, 2005 is acknowledged with appreciation. The examiner's interview summary is accurate as to what transpired at the interview.

As discussed at the interview none of the prior art of record teach or suggest a portable wand with both a visible light and a black light.

Smythe's display device is supplied by "115 volt, 60 cycle alternating current" (column 1, lines 67-68) and is fixed, not a portable wand as recited in claims 1 and 26. Yuen does not teach or suggest a portable wand with both visible and black lights. Cook does not teach or suggest a portable wand with both visible and black lights. Park et al. does not teach or suggest a wand with both visible and black lights.

Claims 15-19 were objected to as being dependent on a rejected claim and indicated as allowable if placed in independent form. Claim 15 has been placed in independent form with claims 16-19 dependent, directly or indirectly, on claim 15.

In view of the above, it is submitted that all of the claims (Nos. 1-29) are in condition for allowance and such action is, respectfully, requested.

If there is any issue remaining to be resolved, the examiner is invited to telephone the undersigned so that resolution can be promptly effected.

A check for \$310 for two additional independent claims, tow additional claims over 20 and a one-month extension of time accompanies this amendment.

It is requested that, if necessary to effect a timely response, this paper be considered as a Petition for an Extension of Time sufficient to effect a timely response with the fee for such extensions and shortages in other fees, being charged, or any overpayment in fees being credited, to the Account of Barnes & Thornburg, Deposit Account No. 10-0435 (35388-94829).

Respectfully submitted,

BARNES & THORNBURG LLP
